

The Sun Room Assembly instructions

Thank you for purchasing the Sun Room from LED Sunshine! Assembly of the Sun Room only takes a few minutes and requires no special tools.

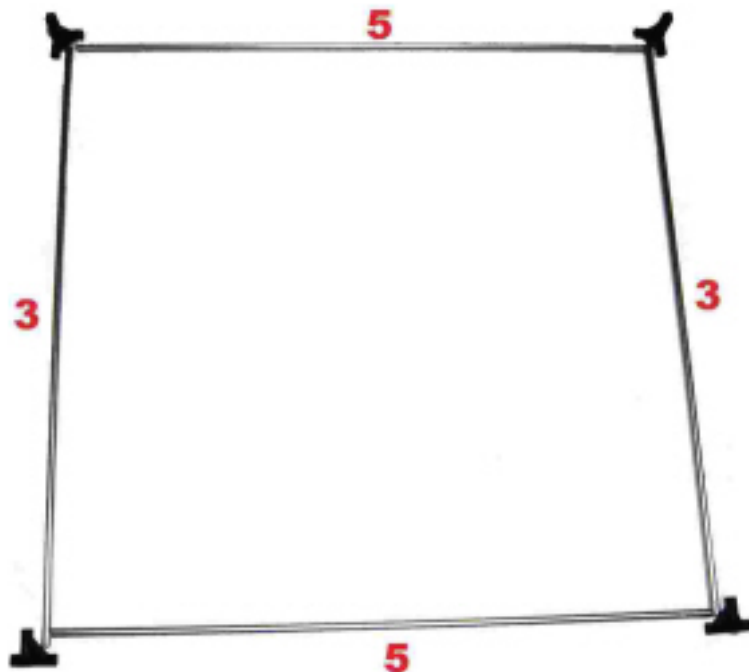

1. Please layout and organize the parts of the Sun Room.
2. Before proceeding, read all instructions to familiarize yourself with the procedure.
3. Exercise care when assembling the corner plastic pieces to the metal frame.
4. Care should also be taken when pulling the cover over the frame's corner pieces.
5. The high quality of the Sun Room should afford the indoor grower years of protection and operation.

Sun Room

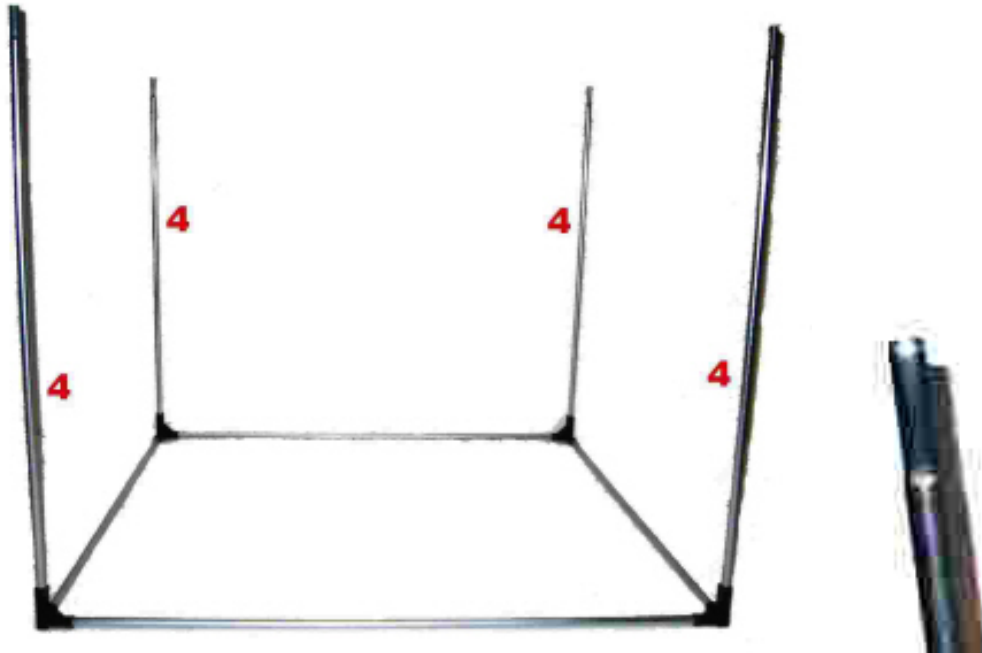

1. Check all of your parts. Due to advances in the design of the Sun Room, some pieces may be slightly different from those shown above. Also, there may be extra corner pieces than what's shown above.

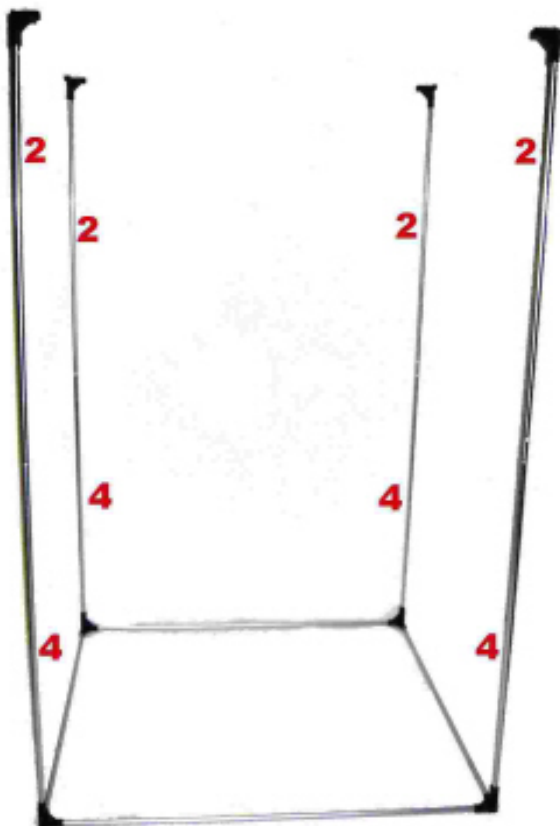

2. Assemble metal pieces (3) & (5) using the corner pieces. Ensure that the square edge is vertical.

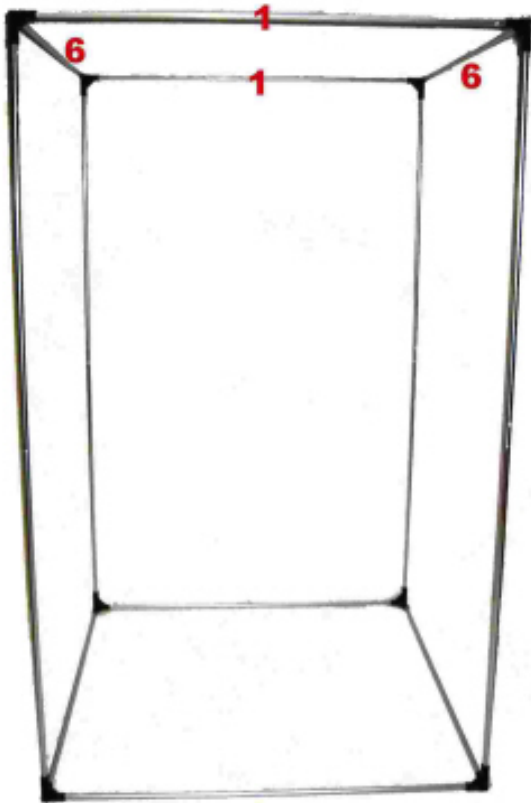

3. Insert (4) into plastic corner piece with the smaller, thinner piece pointing upward.

4. Insert (2) into (4). Connect a corner piece onto (2) with square edge pointing down.

5. Insert (1) and (6) into upper frame.

6. Next, lay the covering of the Sun Room out with the flooring portion open, to allow you to slide the flooring under the bottom of the frame.

7. Next, carefully pull the top of the tent over the top portion of the frame paying attention to the corners. Don't force anything.

8. Place (7) into (6) and (8) into 1) on the top portion of the frame.

9. Place the flooring piece into the bottom of the Sun Room and attach the velco pieces to each wall.

10. That's it, you're done! Congratulations!

We at LED Sunshine wish you years of success in your indoor growing endeavors!
